| You have been tested by your doctor or the County and are informed you test positive | Obtain clearance from your doctor:  
- Requires no fever, symptoms are improving, receive two negative tests in a row, 24hrs apart | Cannot get a clearance test:  
- Requires no fever for at least 72hrs, symptoms are improving, and 7 days have passed since your symptoms first appeared | |
| **An intimate partner or household contact tests positive** (Highest Risk- if the positive contact had symptoms) | No, will need to self-isolate for 14 days after last exposure | Yes. If you have symptoms, we strongly recommended that you seek testing.  
Symptoms may include: fever OR shortness of breath OR cough | Primary care doctor |
| - Someone you live with: roommate, significant other, or intimate partner (includes kissing) | Recommend working from home while the HR works with the Occupational Health Center to review the case | No, unless you have symptoms  
Symptoms include: fever OR shortness of breath OR cough | No care needed if you do not have symptoms  
Self-monitor symptoms and temperature every day, for 14 days since last exposure. If you develop symptoms, contact your care provider  
Look for: fever of greater than 100 degrees Fahrenheit, cough, chills, shortness of breath |
| **A close contact tests positive** (Higher Risk- if the contact had symptoms) | Yes, you can work, if you do NOT have symptoms AND you were not a close contact (see row above) | No, unless you have symptoms  
Symptoms include: fever OR shortness of breath OR cough | No care needed if you do not have symptoms  
You should self-monitor your symptoms every day, for 14 days |
| - Someone you had direct physical and frequent contact with (e.g. teammate, close friend)  
- Someone whose infectious secretions you had direct contact with (e.g. coughed on, sneezed on, or touching used tissues with a bare hand)  
- Someone you had prolonged face-to-face contact within 6 feet, for periods of more than 15 minutes | | | |
| **Coworker or friend tests positive** (Low-Medium Risk- if the contact had symptoms) | Yes, you can work, if you do NOT have symptoms | No, unless you have symptoms  
Symptoms include: fever OR shortness of breath OR cough | No care needed if you do not have symptoms  
You should take general precautions given the community spread of COVID in Santa Clara County |
| - Someone who you walked by or were around, but more than 6 feet away. Someone you were in the same room with, but not within 6 feet for more than 10-15 minutes | | | |
| **Friend of a friend tests positive** (Minimal Risk) | Yes, you can work, if you do NOT have symptoms | No, unless you have symptoms |  |
| - Your best friend's mother, your spouse's co-worker | | | |
| **My patient tested positive**                        | Physicians and other clinical staff who had a close contact exposure with a COVID-positive patient, or who themselves are ill, should inform their supervisor and contact Stanford Hospital Occupational Health Services at 650-723-5922  
Asymptomatic healthcare workers may continue to work with use of a surgical mask in patient care areas following a potential workplace exposure | | |
